Course Overview

Using KPIs (Key Performance Indicators) is a great way to manage performance and keep track of the progress of any project or process. KPIs provide an objective measure of performance, and allow businesses to identify areas where improvement is needed and help them focus their resources on those areas. A few examples of KPIs that can be used to manage performance include customer satisfaction, time to complete tasks, quality of output, cost per unit and revenue per sale. By tracking and analysing these indicators, businesses are able to identify trends and problems in their performance, which can help them devise strategies to improve overall efficiency.
